CORNER RADIUS TEMPLATE **IMPORTANT**

When printing this template,  set PAGE SCALING to NONE or your measurements will not be accurate.

**THIS BOX
MUST
MEASURE
1"x 1"**

Classic Pool & Spa will not be held responsible for improperly measured covers.

Use this template as a guide for measuring the corner of your spa for a new cover.

A radius of 9" will extend 1" beyond the width of this printed page; a 10" radius will be 2".

**If in doubt
always use
the next size
SMALLER.**

A radius of less than 2" will be made as a SQUARE CORNER.

SPA COVER MEASURING GUIDE

MEASURE YOUR SPA. If your current cover is waterlogged, warped, or misshapen in any way your measurements will not be accurate.

MEASURE EACH REQUESTED DIMENSION IN INCHES AT THE WIDEST POINT. Round-up every measurement to the nearest inch. If the cover is too big, it will work. If it is too small, it won't. In cases where your measurements are close to a perfect square, like 88.5" x 88", it probably is.

MEASURE DIMENSIONS BASED ON THE INSTALLATION TYPE THAT BEST MATCHES YOUR OWN:

Elliptical (Bowed) Hot Spring

Dimension A: _____ Dimension B: _____
(Radius measurement not needed for this shape)

Do you have a factory installed cover lift that attaches to the inside of the cover?
Yes ___ No ___

IMPORTANT

GET THE FOLD RIGHT!

90% of the time the fold cuts the longest dimension in half but it can cut the shortest dimension in half too.

The fold always cuts the **DIMENSION A** in half. Be sure to enter the correct dimension in "A".

Rounded Square or Rectangle

Dimension A: _____ Dimension C: _____

Dimension B: _____
Please measure the corner radius (C). Using a carpenter's square makes this easy but a tape measure and a little "eyeballing" will do.

Square or Rectangle

Dimension A: _____

Dimension B: _____

COVER SKIRT LENGTH: _____

A spa cover skirt is the portion of your fabric that extends down from your cover bottom and overlaps the top of your spa.

If your spa has a rail that sticks out from the cabinet under the acrylic, most people extend the skirt down past the rail. If you do this, be sure the cover is wide enough around so that the skirt can hang straight down.

SAFETY STRAP LENGTH: _____

Please measure the safety straps (tie downs) from the bottom of the cover down to where the strap meets the clip (do not include the clip itself).

In order to maintain high safety ratings, spa covers are shipped with safety straps. If you have a flush mount you can order straps that are just 1 inch longer than your skirt.
